Leading AK8 jet p_T (GeV)

Detailed description: The main plot is a stacked histogram. The top panel shows event counts on a logarithmic y-axis from 10⁻² to 10⁶. The bottom panel shows the Data/MC ratio on a linear y-axis from 0 to 2. The x-axis for both panels is 'Leading AK8 jet p_T (GeV)' ranging from 200 to 1400. The top panel shows a blue histogram for 'Top' events, a pink histogram for 'QCD Multijet', and a teal histogram for 'DY'. The bottom panel shows black circles with error bars for the Data/MC ratio, which is mostly around 1. A hatched band indicates the statistical and systematic uncertainty.
