Leading AK8 jet p_T (GeV)

Detailed description: The figure consists of two panels sharing a common x-axis labeled 'Leading AK8 jet p_T (GeV)' ranging from 200 to 1500. The top panel is a stacked histogram showing event counts on a logarithmic y-axis from 10⁻¹ to 10⁶. The background components are stacked from bottom to top: VV+VVV (dark olive green), Top (blue), Photon+jet (purple), W → ℓν (tan), Z → νν̄ (orange), and QCD Multijet (pink). Data points are shown as black circles with error bars. A hatched band represents the statistical and systematic uncertainty. The bottom panel shows the ratio of data to Monte Carlo simulation (Data/MC) on a linear y-axis from 0 to 2. Data points are black circles with error bars, and a horizontal line at 1.0 represents the expected ratio, with a hatched band indicating the uncertainty.
